PIEDMONT PLANTS

1937

TO OUR CUSTOMERS AND FRIENDS, GREETINGS:

Here is your copy of our 1937 Plant Catalogue. For more than 30 years we have been supplying dependable plants to gardeners throughout the country. Our business has been built up on First Quality Plants, Good Service, Square Dealing, and Low Prices.

We grow plants exclusively, planting several hundred acres in seed beds each year. The best seed and cultural methods are used, and all **PIEDMONT PLANTS** are carefully selected and packed. We do not believe you can buy better plants anywhere, or plants of equal quality at lower prices.

Your attention is directed to the many advantages of **PIEDMONT PLANTS** over homegrown or greenhouse plants. They will save you money and trouble, and enable you to realize larger profits by earlier maturity.

To our old customers we wish to express our sincere appreciation for the fine business they have given us in the past, and especially to those who have been kind enough to recommend our plants to their friends. Good will is the foundation of a successful business, and has been defined as the inclination of a customer to return to the place where he has been well served. It is our desire to continue to merit your kind consideration.

We solicit your patronage on the basis of our **GUARANTEE** on inside cover of this catalogue.

Cordially yours,

PIEDMONT PLANT CO.

Lettuce on Our Trial Grounds at Greenville, S. C.

PIEDMONT FIELD-GROWN PLANTS

The market gardener who grows vegetables for early market knows how important it is to get crops on the market early, if large profits are to be realized. The home gardener also wants early vegetables. To get an early start it is necessary to grow seedlings in hot beds, transplanting them to cold frames to harden. The best and cheapest solution of the problem is to set Piedmont Field Grown Plants.

We offer in this catalogue a line of high grade Field Grown Vegetable Plants for early setting that we guarantee to give satisfaction. The business of growing and shipping vegetable plants has developed tremendously in the past 20 years. Hundreds of millions of plants are shipped annually to truckers, market gardeners, and home gardeners, who find it more profitable to buy plants than to attempt to grow them.

QUALITY IN PLANTS

SUITABLE CLIMATE NECESSARY. Every year millions of plants are shipped from along the Gulf Coast and South Texas, where the climate is mild, that are not well hardened, and are not suitable for early setting. In the middle south the climate is adapted to growing plants in the open, which are hardy enough to set in the open farther north. Our farms are located where there is enough cold weather to grow plants hardy enough to set in the open field.

SELECTED PLANTS. Piedmont Plants are grown from high grade seed, and will be found true to type and variety. Our plants are hand selected, and are large enough to set in the field. No small, inferior, trashy plants shipped. We ship you the kind you order, properly labeled, and full count guaranteed.

REAL FROST-PROOF CABBAGE PLANTS

The Frostproof Cabbage Plant has become so well known that it is hardly necessary to point out its advantages.

On our farms the soil and climate are especially adapted to the growing of hardy, tough, healthy cabbage plants. The plants make a slow growth during the early part of the winter and spring, and soon become very tough and hardy. They will stand a temperature of 20 degrees above zero without injury and can be shipped to territory with a colder climate. Light snows, sleet, and moderate freezes will not hurt them, and they can be set in the open four to six weeks earlier than hotbed plants. The top of the plant does not grow, but the root becomes established, enabling the plant to make a rapid start, and mature headed cabbage two or three weeks earlier.

Piedmont Field grown Frostproof Cabbage Plants will produce bumper crops early enough to get top prices.

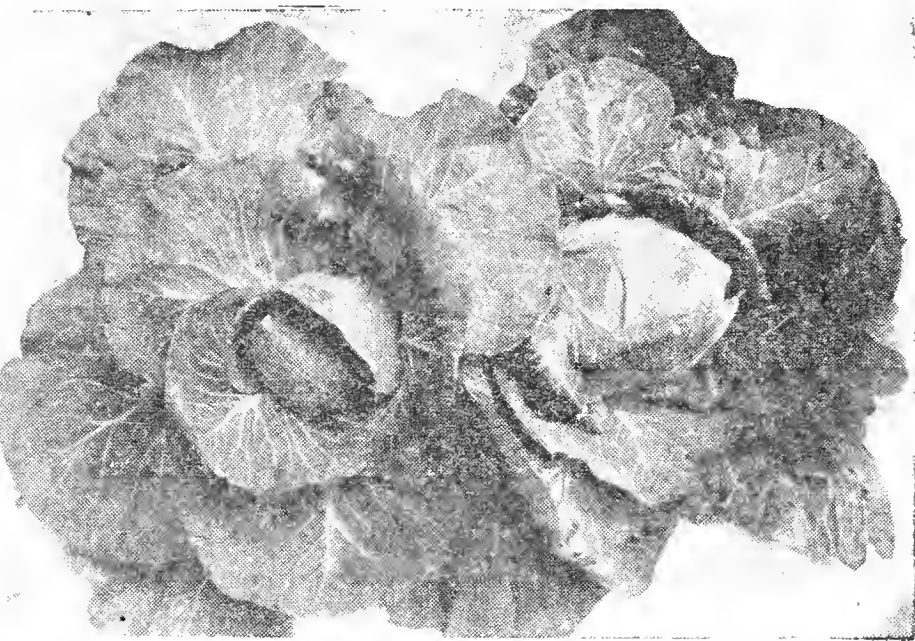

HOW TO USE OUR FROSTPROOF CABBAGE PLANTS

For early cabbage select a deep sandy loam with southern exposure. Apply broadcast ten to fifteen loads of well rotted stable manure to the acre and plow in. Harrow the land thoroughly and lay off the rows east and west three feet apart. Drill in the furrows 500 to 1,000 pounds of high grade fertilizer to the acre and mix well with the soil. Bed on this and then run a small furrow in the top of the bed. Set the plants in this open furrow 15 to 20 inches apart for Wakefield, Golden Acre and Copenhagen Market, and 24 inches for larger varieties. The plants should be set deep in the ground up to the first leaf to keep the stem from freezing. When the ground begins to get warm cultivate frequently and apply 200 pounds of nitrate of soda to the acre

VARIETIES of **Frost-Proof Cabbage Plants**

EARLY JERSEY WAKEFIELD

Many market gardeners consider this the very best cabbage in cultivation for early market, and is more largely grown than any other early cabbage. Its merits are many, among which are uniformity in earliness and crop. The head is pointed in shape, of medium size, and is white, solid and tender. It is beyond question the best variety for early market and always brings a good price on account

of its earliness, thereby netting the grower large returns. Our strain of this variety is the very best. Ready Jan. 1st to July.

CHARLESTON WAKEFIELD

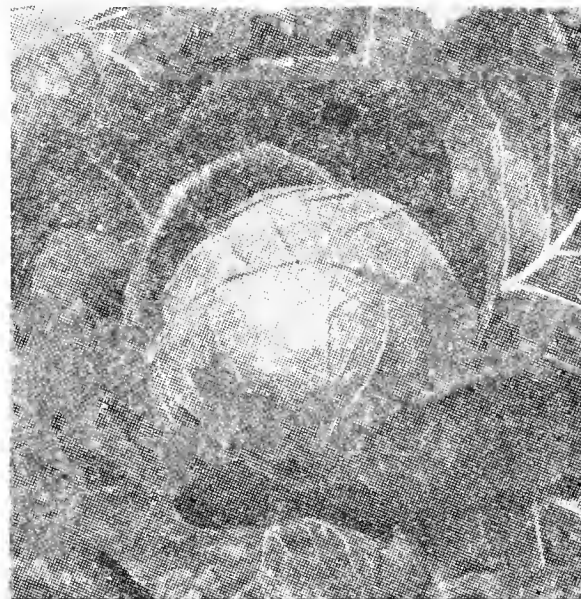

This is a selection of the Early Jersey Wakefield but makes a much larger head, and a week to ten days later. It stands pre-eminent as the best spring cabbage for the South. It is probably more largely planted for shipment than any other variety. The heads are of uniform size, and maturity, and of very large size for an early cabbage. A strong favorite with Southern growers as a main crop. Ready Jan. 1st to July.

GOLDEN ACRE

A selection of the Copenhagen Market with heads a little smaller but matures earlier. Earliest of the round head varieties. A splendid new variety becoming very popular. Ready Jan. 1st to July.

COPENHAGEN MARKET

This is the very earliest of the round headed varieties. Its chief features besides earliness are remarkable size, averaging 10 pounds, compactness, even maturity, fine quality. Maturing at about the same time as the Early Jersey Wakefield, it produces larger heads than any other cabbage equally as early. The heads are heavy in weight, ball shaped, solid and firm, with a small core, fine texture and splendid quality. Ready Jan. 1st to July.

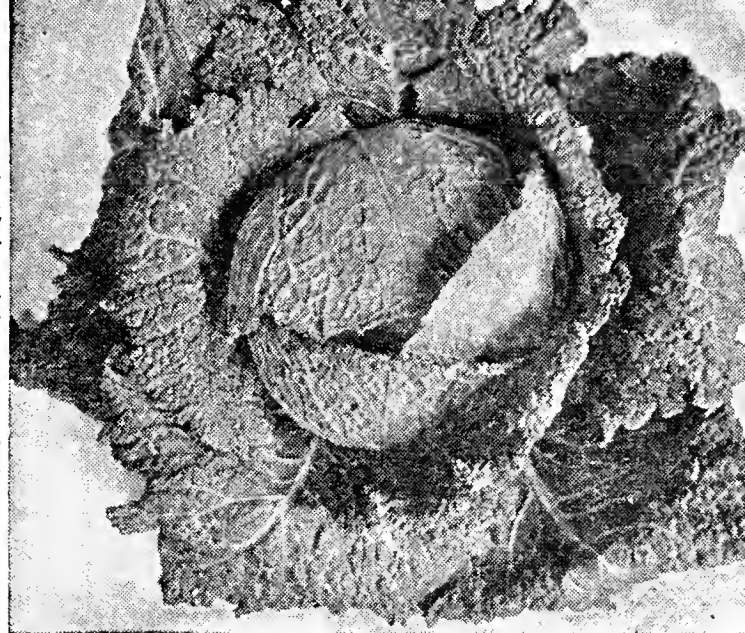

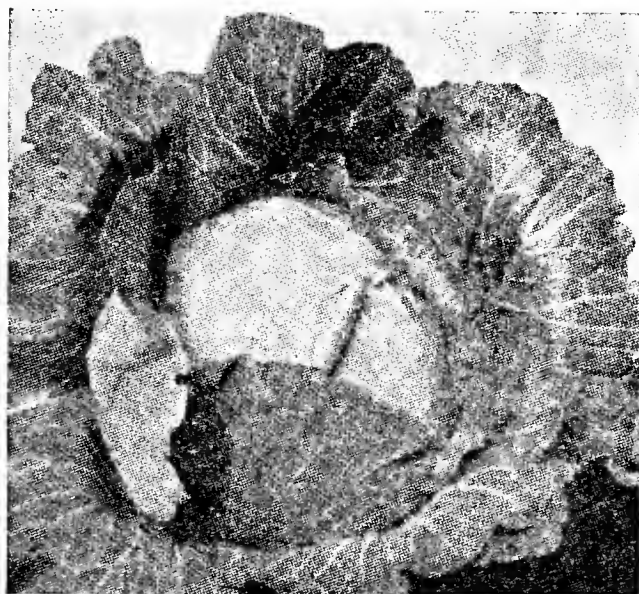

EARLY FLAT DUTCH

This variety needs no recommendation, because it is one of the largest in cultivation, the heads are very solid, distinctly flattened on top and of excellent quality. It invariably forms very large and at the same time very hard heads, uniform in size and shape. It has a very short stem, and is a very compact grower, forming few loose leaves. Ready Jan. 1st. to July.

DANISH BALL HEAD OR HOLLANDER

Most widely used and the best of late cabbages; desirable for shipping, for storage and for kraut. Plants medium with short stem. Heads very attractive, deep, round, extremely solid. Plants ready April 1st to July.

SAVOY, DRUMHEAD

The best of the savoy type for general use; an excellent keeper. Heads nearly round, full and hard; leaves large, coarsely crimped, dark bluish green; of good quality. Plants of this variety ready April 1st to July.

MAMMOTH RED ROCK

Large, round heads, solid as a rock, and red throughout. Used extensively for pickling. A good keeper. Ready April 1st to July.

IT TAKES 10,000 TO 12,000 CABBAGE PLANTS TO SET AN ACRE

YELLOWS OR WILT RESISTANT VARIETIES

These varieties will produce a good crop of cabbage on land infested with yellows disease where ordinary varieties fail. Ready April 1st.

MARION MARKET—Copenhagen Type.

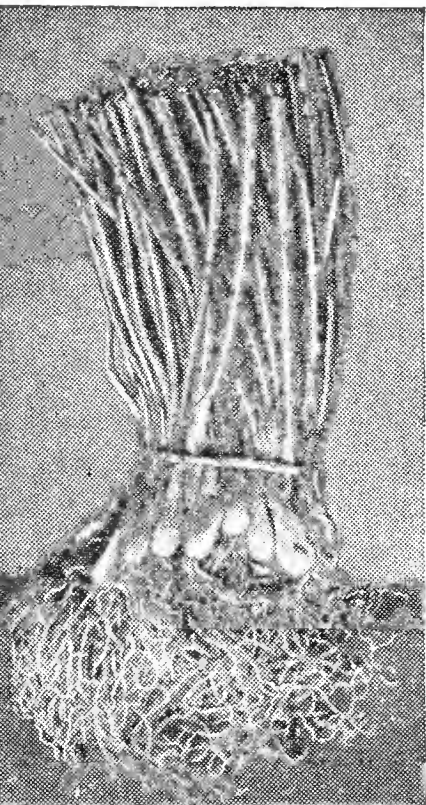

WISCONSIN ALL-SEASON—Midseason variety.

Prices on Yellows Resistant Varieties: Postpaid: 500 for \$1.50; 1,000 for \$2.50. Express Collect: 1,000 for \$1.50; 5,000 for \$6.25; 10,000 and over at \$1.00 per 1,000.

FROST-PROOF ONION PLANTS

Southern grown onion plants are no longer an experiment. Large quantities are set out every year, and they are rapidly displacing sets.

They will grow large, sweet onions early, and are good keepers. They produce onions two to three times larger than sets, and seldom run to seed. They can be set early, the same time you would put out sets or cabbage plants. Therefore we strongly advise you to use our plants instead of sets, whether for the market or home use. Piedmont Onion Plants are grown from the very best seed, and will be found true to name. Ready Jan. 1st to July.

HOW TO USE OUR FROSTPROOF ONION PLANTS

Early onions do best on a rich sandy loam. The land should be highly fertilized and thoroughly prepared. The plants should be set in rows 16 to 24 inches apart, and 3 to 6 inches in the row, depending on the fertility of your land. Cultivate shallow and keep free from weeds. Harvest when the top turns yellow, allowing them to lie on the top of the ground a day or two, and store in a cool place.

VARIETIES

YELLOW BERMUDA. The most popular and widely planted of the Bermuda varieties. It is sometimes called the White Bermuda although it is a light yellow or straw color. This is a thin flat shaped onion, and very sweet; many people eat them like an apple.

CRYSTAL WAX BERMUDA. One of the most attractive onions grown. It is a clear, waxy white onion, and has the same delightful mild flavor as the Yellow Bermuda. It is the same shape as the Yellow Bermuda.

PRIZETAKER. The largest and most handsome of the yellow varieties. It is light yellow in color and globe shaped, and grows to a large size. The flesh is white, and mild, and it is a good keeper.

VALENCIA OR SWEET SPANISH. A globe shaped onion, light yellow in color, and grows as large as the Prizetaker. It is mild in flavor, a good yielder and a splendid keeper.

NOTE—We will assort Cabbage and Onion Plants in even hundreds in the same order as you desire. Onion Plants are tied in bunches of 100.

PIEDMONT LETTUCE PLANTS

While not quite so hardy as cabbage and onion plants, our Lettuce plants will stand considerable frost and cold weather. Thousands of carloads of Iceberg and New York Improved Lettuce are shipped from California each year. Good head lettuce can be grown in the home garden. Set out some of our plants this year instead of buying your lettuce. Set out at about the same time as cabbage. Plants ready Jan. 1st.

VARIETIES: Iceberg, New York Improved, New York No. 12.

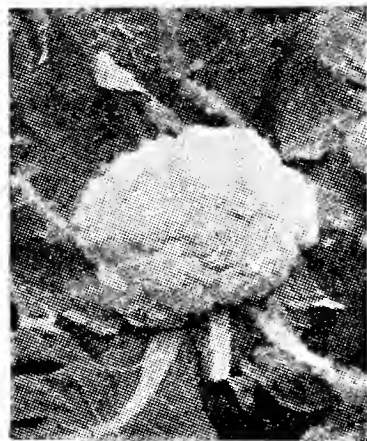

PRICES: By Mail Postpaid—100 for 40c; 500 for \$1.25; 1,000 for \$2.25. By Express or Parcel Post Collect—500 for 80c; 1,000 for \$1.50; 5,000 for \$6.25.

PIEDMONT BROCCOLI PLANTS

Ready April 1st—Calabrese Improved, Green Sprouting. A delicious vegetable, steadily gaining in favor. Similar to cauliflower, but hardier.

PRICES: By Mail Postpaid—100 for 50c; 500 for \$1.50; 1,000 for \$2.50. By Express Collect—\$1.50 for 1,000; 5,000 for \$6.25.

PIEDMONT CAULIFLOWER PLANTS

Ready April 1st. Our cauliflower plants are hardy and may be set earlier than home grown plants. Variety: Early Snowball, best and most widely used early variety.

PRICES: By Mail Postpaid—50 for 50c; 100 for 75c; 500 for \$2.00; 1,000 for \$3.00. Express Collect—\$2.50 per 1,000; 5,000 for \$10.00.

PIEDMONT BEET PLANTS

Set our beet plants for early crop. Varieties: Detroit Dark Red, Crosby Egyptian. Ready April 1st.

PRICES: By Mail Postpaid—100 for 50c; 500 for \$1.50; 1,000 for \$2.50. By Express Collect—\$1.50 for 1,000; \$6.25 for 5,000.

Tomato Plants in the Open Field

PIEDMONT FIELD-GROWN TOMATO PLANTS

Piedmont tomato plants, like the cabbage plants are field grown, but they are not frost-proof, as it is impossible to grow a frostproof tomato plant. However, they are not tender seedlings like you get from a greenhouse. They are suitable for setting in the open after danger of frost is over, unless you are prepared to protect them. They are strong and thrifty, and will give you tomatoes earlier than hot house plants. Our tomato plants are grown from certified seed and will be found true to variety. We use special care in packing these plants, each bunch being wrapped in damp moss and waxed paper. We can ship tomato plants any time you want them between April 15th, and July 1st.

CULTURAL DIRECTIONS: Tomatoes do well on a wide variety of soils, and the use of fertilizer will depend on the soil. For early tomatoes set our field grown plants in 3½ foot rows, 2 feet apart as soon as danger of frost is over. For earlier setting they may be protected in the field with "hot-caps." For earliest fruitings, pinch off all side shoots, and tie the single stem to a stake. For ordinary field crop, set plants 4 feet each way in checks and cultivate both ways.

VARIETIES

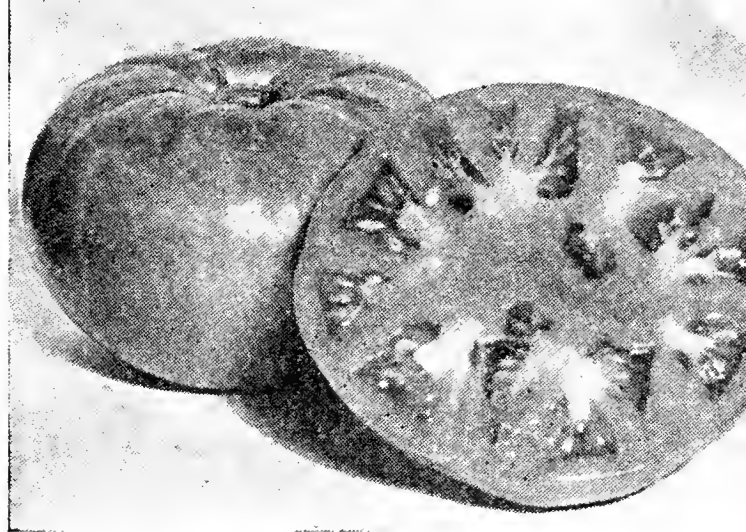

EARLIANA. The Earliana is probably the earliest tomato grown, and is very popular for early market. The fruit is deep scarlet, medium to large size, and smooth for an early tomato.

BONNY BEST. A fine variety for early market and home garden. Vines are vigorous and fruit bright scarlet in color, and uniform in ripening.

PRITCHARD OR SCARLET TOPPER. A wilt resistant variety similar to the Marglobe but earlier. It is disease resistant and very productive. The fruit is scarlet, large, smooth and globular in shape.

MARGLOBE. Wilt resistant tomato developed by U. S. Department of Agriculture. Fruit medium size, smooth and solid; globe shape, scarlet color, good shipper. Has become very popular for main crop.

GREATER BALTIMORE. A mid-season variety, very popular for main crop and canning. Probably more of this variety used by large canners than any other variety. Very dependable, producing extra heavy crop of large firm tomatoes.

IT TAKES 3,000 TO 5,000 TOMATO PLANTS TO SET AN ACRE PIEDMONT EGGPLANT PLANTS

Our Eggplant Plants are field grown like the tomato and pepper plants. Large plants ready for field setting. Ready April 20th to June 15th.

Variety: Black Beauty.

Prices: By Mail Postpaid—50 for 50c; 100 for 75c; 500 for \$2.50; 1,000 for \$3.00. By Express Collect—\$2.50 per 1,000; 5,000 for \$10.00.

Sweet Potato Plants

VARIETY: PORTO RICO

Our Potato Plants are grown from selected seed stock grown on our own farms. They are treated for all kinds of disease, and are government inspected. Our customers are therefore protected from the many kinds of potato plant diseases which are becoming so prevalent throughout the South.

All potato plant orders are booked and shipped in the order in which they are received. We advise you to place your order early, stating when you want them shipped. We advise you to have potato plants shipped by express. Ready April 20 to July 1.

HOW TO GROW SWEET POTATOES: A warm, well drained, sandy loam is the best land for sweet potatoes. After plowing and harrowing thoroughly, lay off rows 3 feet apart and drill 500 to 1,000 pounds of commercial fertilizer containing plenty of potash but not much nitrogen. List on the fertilizer, and knock off the top of the ridge. Set the plants 15 inches apart. Cultivate thoroughly until the vines begin to run. Harvest when mature or when frost kills the vines. Store in a warm cellar or building where the temperature does not go below 50 degrees.

PIEDMONT PEPPER PLANTS

Our Pepper Plants like Tomato Plants are suitable for setting in the open after danger of frost is over. Our plants are field grown and therefore more hardy than hotbed plants. Good plants carefully packed. Plants ready April 15th to June 1st.

VARIETIES: Sweet—California Wonder, Ruby King; Hot—Long Red Cayenne.

PRICES: By Mail Postpaid—50 for 50c; 100 for 75c; 500 for \$2.00; 1,000 for \$3.00. By Express—\$2.50 per 1,000; 5,000 for \$10.00.

ANNUAL FLOWER PLANTS

We offer below a list of Annual Summer Bedding Plants. In our mild climate we can grow these plants in the open field by the same methods that we grow tomato and other tender plants.

In order to get early flowers in the north it is necessary to start most of these annuals indoors, transplanting to beds when danger of frost is over. By ordering your flower plants from us you are saved this trouble, and can get your flower plants at the same time you order tomato plants.

Our prices are much cheaper than greenhouse plants. Order enough for your borders, and for a generous supply of cut flowers. Large healthy seedlings ready to set in the open. Plants ready April 20th. As all the varieties listed below are well known we have reduced description to a minimum.

SWEET ALYSSUM (Maritimum)—Spreading growth eight inches high for edging. Postpaid: 25c per dozen; 50 for 60c; 100 for 90c.

ASTERS—Unsurpassed for cut flowers. Queen of the Market Mixed—Wilt Resistant Postpaid: 25c per dozen; 50 for 60c; 100 for 90c.

CALENDULA—Scotch or Pot Marigold—Bloom all summer—Variety: Balls Gold. Postpaid, 25c per dozen; 60 for 60c; 100 for 90c.

MARIGOLD—Variety: Guinea Gold—Brilliant Orange Carnation-like flowers. Postpaid: 25c per dozen; 50 for 60c; 100 for 90c.

PANSY—Spring grown plants for late summer blooming—Giant Bedding—mixed colors. Postpaid: 30c per dozen; 50 for 75c; 100 for \$1.00.

PETUNIA—Varieties: Rosy Morn and Rose of Heaven, rose; Cockatoo, purple; General Dodds, crimson. Postpaid: 25c per dozen; 50 for 60c; 100 for 90c.

PHLOX DRUMMONDI—Large Flowered Mixed—All the best colors. Postpaid: 30c per dozen; 60 for 75c; 100 for \$1.00.

ANNUAL FLOWER PLANTS (Cont'd)

SALVIA—America, bright scarlet color. Postpaid: 30c per dozen; 50 for 75c; 100 for \$1.00.

SNAPDRAGON—Varieties: Suntan, rosy tan; Afterglow, bronze; Ceylon Court, yellow; Rose Queen, rose; White Rock, white. Postpaid: 30c per dozen; 50 for 75c; 100 for \$1.00.

VERBENA—Beauty of Oxford Hybrids, beautiful colors shading from rose-pink to rose-red. Postpaid: 30c per dozen; 50 for 75c; 100 for \$1.00.

ZINNIA—Dahlia Flowered Mixed. Gorgeous, long stemmed resembling dahlias; Giant California mixed, magnificent double flowers. Postpaid: 30c per dozen; 50 for 75c; 100 for \$1.00.

NOTE—Order flower plants in dozens, fifties, or hundreds of one variety. We cannot mix different varieties at above prices.

EXPRESS SHIPMENTS

Due to the fact that the Express Companies have reduced their rates nearly 30%, while parcel post rates are the same it is cheaper to order your plants by express in lots of 2,000 and over to a shipment. We give below a scale of express charges per 1,000 plants to different states. We will prepay your order by express if you add the right amount according to this scale to your remittance at Express Prices. We do not prepay orders if you do not send the money with the order.

EXPRESS CHARGES PER 1,000 PLANTS

VARIETY	Georgia, Florida, Alabama, S. C.	Miss., La., Ark., Tenn., Ky., Va., N. C.	Tex., Okla., Mo., Ia., Ill., Ind., Ohio, Wis., Mich., Pa., N. Y., N. J., Md.	All Other States East of the Rockies.

HIGH GRADE VEGETABLE PLANTS

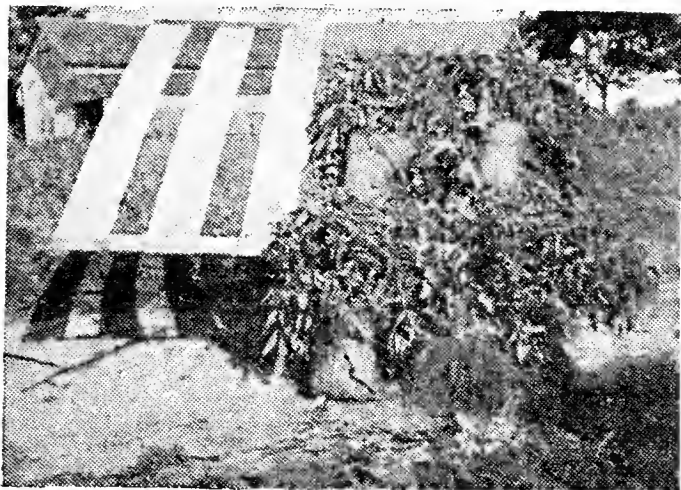

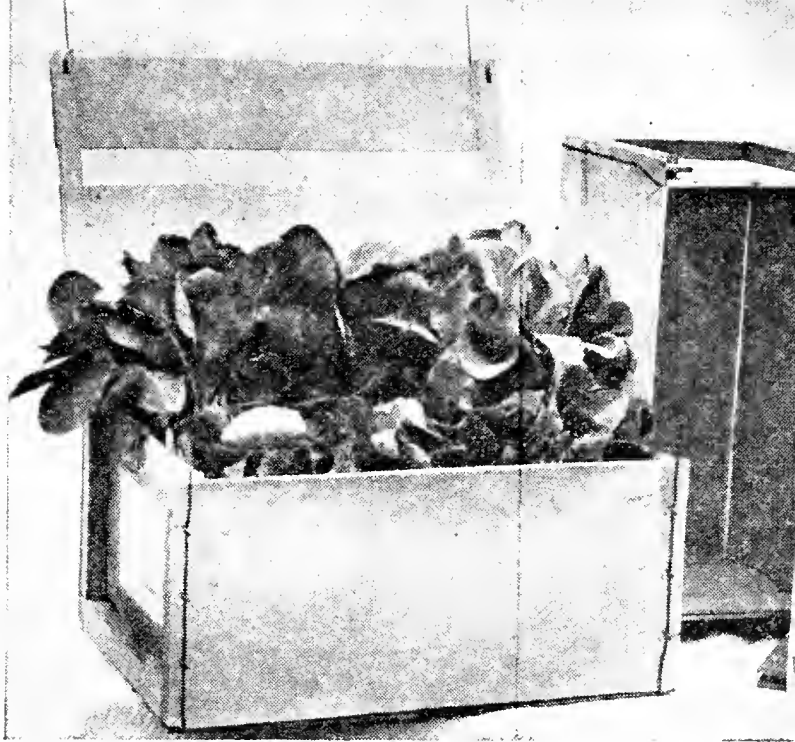

ALBANY,

GEORGIA

PACKING AND SHIPPING

Our plants are carefully packed in light, wire bound, wood veneer crates, as shown in the illustration. From long experience we find these crates are much superior to any other kind of container. They will stand rough handling, will not crush in like paper boxes, and are so ventilated as to deliver the plants to you in perfect condition. All plants are tied in bunches of 50, the tops are ventilated and the roots protected from exposure to the air. We guarantee to deliver plants anywhere in the United States.

TERMS

Our terms are cash with order or C. O. D. Collect mail shipments can be sent C. O. D. for postage if there is a money order office at your post office. C. O. D. mail orders can be shipped C. O. D. for plants and postage.

SUGGESTIONS TO CUSTOMERS

NAME, ADDRESS, ETC. We wish to impress upon you the importance of writing your name and full address plainly. If your express office is different from your post office, be sure to give it. We receive orders every year with faulty addresses, which cause unnecessary delay.

REMITTANCES. You can send money safely by P. O. order, bank draft, or check, and registered letter. Do not send stamps.

ORDERING DIFFERENT VARIETIES OF PLANTS. We do not ship less than 100 plants of any variety. If you order cabbage, onion, tomato plants, etc., at the same time, make your remittance to cover the quantity of each kind of plant you order at prices quoted. If you wish to make your order in advance for tomato and potato plants you may do so by giving the date you wish the order shipped. By making one order this will be a saving to you.

CARE OF PLANTS. As soon as your plants come, take them out of the crates and set them out. If not ready to set, trench them out. If your plants look yellow and dead, do not jump to the conclusion that they are worthless. FROSTPROOF Cabbage plants always look brown and tough, and may look yellow after long shipment. Proper care and attention will bring them out, and they will make better cabbage than green, sappy plants.

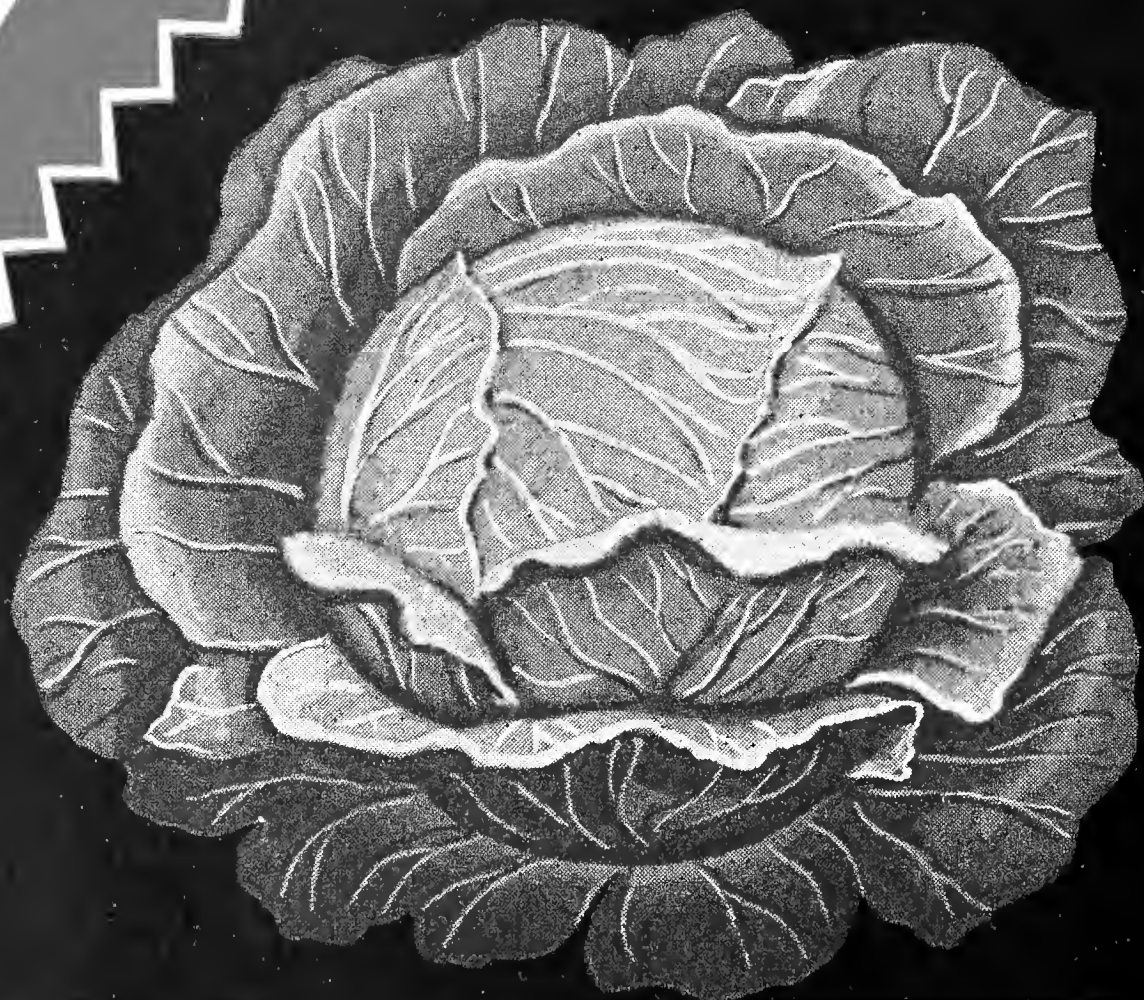

NON-WARRANTY. While we exercise great care to have our plants pure and reliable, we give no warranty expressed or implied. We cannot be in any way responsible for the crop.
